

360° Camera Article

Title: Never get another scratch again!

Subtitle: Keep your luxury coach protected with groundbreaking a 360° camera!

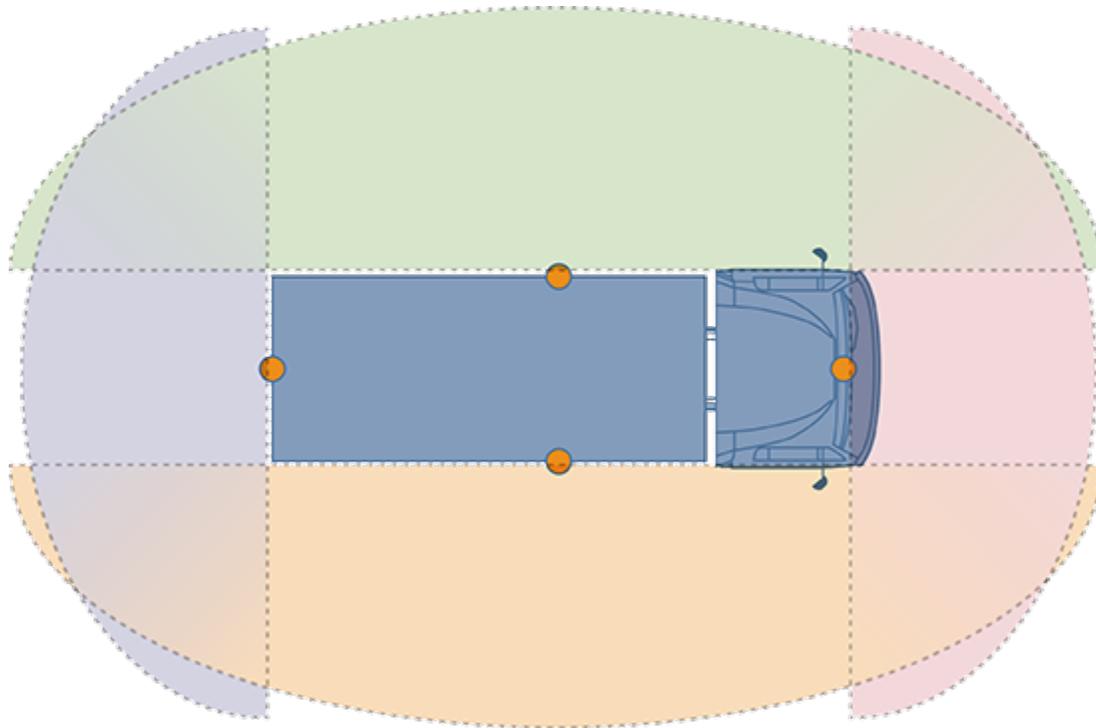

Content:

You are the master of your Millennium Luxury Coach. You know every polished inch of her interior and every lovingly waxed inch on the outside. Driving her is second nature to you now. She talks to you on the road. And you listen. What could be better?

Millennium Luxury Coaches is proud to announce a new technology that will take your amazing driving experience and make it even better. It will be more seamless, more flawless, and more superb than ever before.

Introducing the 360° camera, a revolutionary approach that will change how you drive.

Imagine being able to see completely around your car in one simple overhead view. No more glancing spastically back and forth between mirrors and cameras as you desperately hope nothing's escaped your attention. One perfect bird's eye view of every blind spot, corner, side, and inch of your home on the road. (Adam note: Since this image is a truck, I can try to make a graphic that shows the coach instead, but it's going to take me some time and effort.)

How does it work? Would you believe magic?

While magic isn't actually the answer, it may as well be! This patented technology is an evolved multi-camera monitor system that is designed to make low-speed maneuvering as easy as driving straight down an empty road.

An ultra wide-angle camera with a viewing angle over 180° is high-mounted to the front, rear and each side of your Millennium Luxury Coach. Covering all four sides of your coach, each camera's feed is captured and fed to your device, and this is where the magic happens.

The live images are instantly processed, combined, and merged together simultaneously, and then transmitted to your screen as one image. One clear, smooth real-time video that gives you an unobstructed, perfect view of all four sides. No more blind spots. No more hesitation in tight spaces. No more fear.

Abracadabra.

More safety and security.

In addition to being able to drive through narrow streets, congested traffic, and around tight corners with ease thanks to this revolutionary 360° camera technology, this upgrade will also provide Millennium Luxury Coach owners like you with peace of mind. At any given moment, you have immediate access, using your handheld device or monitor, to a live video stream of all four sides of your coach. If anyone or anything approaches, you'll be able to track, watch, and record their movements effortlessly.

Now available at Millennium Luxury Coach!

All 2019 Millennium Luxury Coach models will come with this brand new 360° camera technology standard. If you have an earlier model, call us today to schedule a service appointment, and we can tell you about retrofitting your luxury coach with the magic of the 360° camera!
